Tips for Advisors

- 1) Please figure out with your students a rotation that will work so that all students will get equal access to the camera. We recommend that each student has the camera her/himself for two days.
- 2) Discuss safety concerns with your photographers. In no case should any photographer be out alone at night or in an unsafe area.
- 3) There should be enough storage on the memory card for each student to store about 50 pictures. Please remind them to leave space on the card for others.
- 4) Please help keep track of all the gear. Each camera case should include the following:
 - a. Camera
 - b. Three batteries (one in the camera and two extra)
 - c. Battery charger
 - d. Lens cap
 - e. Memory card (in the camera)
- 5) Make sure that each student you are sponsoring secures the permission of his/her parent or guardian, and that you bring the permission slips to the second workshop.
- 6) Make sure that your participants get a written release from all people they photograph.
- 7) Remind each student to document their rationale for taking each photo. This will be important when they are asked to write captions.
- 8) Offer help as needed for photographers unsure about what images they want to take. Feel free to call Andi with any questions or support that YOU need.
